

LAST GENERATION CONTROL CENTRES

The **General Directorate for Traffic**, via **SICE**, has relied on Roomdimensions to fully equip the new Control Center in Zaragoza.

Roomdimensions has been contracted by SICE to comprehensively equip the new control center of the General Directorate for Traffic located in the city of Zaragoza, Spain.

The Project Scope relied on the **organization of all the operational workstations** of the main control room and of the annexed crisis room, employing solutions designed and developed specifically for this particular operating environment, such as the audiovisual **TOTEM's** of the operators. The project was developed using our highly performant range of technical furniture

KOMPAS console, which allowed an excellent distribution of space and the creation of a perfect workplace for each user.

Each workstation was equipped with its own cable conduction and management system, connectivity elements for computers and electronic equipment, connectivity points for the personal use of the operators, filing modules, CXO 24x7 ergonomic seating, articulated monitor supports for the management of the LCD displays, electronic compartments specially destined to the location of the computer equipment.

Scope of the project:

6 operations work posts | 4 administrative work posts | 1 Supervisor workstation | 1 Crisis Room for 14 operators

Roomdimension Ibérica, S.L. is a manufacturer expert in the development of technical solutions for control rooms and 24x7 operations environments, with extensive experience in the vast majority of the markets and numerous references in the international markets such as: UAE, Saudi Arabia, Mexico, Venezuela, Angola, Nigeria as well as the European market.
