**Lite Evo Console** is an extremely versatile console due to its high adaptability to any control center. It can be the lightest console or become the highest capacity console by simply combining compartments.

Integrates the **4YC Control Status** to manage environment, workstations and the console itself thanks to sensors and actuators.

### FEATURES

- ✓ Maximum versatility.
- ✓ Great connectivity between compartments.
- ✓ Easy adaptation to requirements.
- ✓ Lift / Stand position
- ✓ High storage
- ✓ Integration of 4YC Console Status.

**Lan Console** is a product that seeks maximum effectiveness and balance in terms of cost-performance ratio.

It is a highly robust and reliable product that provides efficient solutions for the organization of simple and highly flexible 24x7 operations environments.

## FEATURES

- ✓ High capacity.
- ✓ The structural feet of the console houses itself all the required equipment
- ✓ Multiple configurations and finishes considering required equipment & systems
- ✓ Device Support System
- ✓ Strong industrial character
- ✓ Connectivity: easy to customize voice, data & power sockets in different areas of the workstation optimizing security
- ✓ Space for personal storage

Lan Console Height regulation same simplicity than LAN console in terms of aesthetics but with liftable table board.

Simple design with the help of a Device Support System below on the back of the cable duct to store electronic equipment.

## FEATURES

- ✓ Option to lift the tableboard depending on the operator position: sit or stand up
- ✓ Adjustable height from 740 mm. minimum to 1.040 mm. maximum
- ✓ Lateral pistons that lift the tableboard trough a button hidden below the tableboard
- ✓ The device support system can house small electronic equipment
- ✓ Flexible cableduct to drive the cabling from the fix part of the structure to the lifting table board

Lan Console is a product that seeks maximum effectiveness and balance in terms of cost-performance ratio.

It is a highly robust and reliable product that provides efficient solutions for the organization of simple and highly flexible 24x7 operations environments.

## FEATURES

- ✓ Designed for workstations with a high number of monitors. Monitor supports are hung directly to the Rail Support System
- ✓ The wiring of the monitors flows directly to the rear of the console
- ✓ This version is adapted to operators with a strong need of capacity for electronic equipment. The electronic compartments hosts the PCs of the operators. The body is divided into the electronics and connectivity area

The V-Concept console is based on a simple, dynamic, lightweight and minimalist design. The design of the structure is totally modular, with all its elements integrated into its characteristic "V" shape in section.

This allows the creation of multiple posts where communication between the different operators is facilitated.

## FEATURES

- ✓ Clean design lines with HPL covers around the structure.
- ✓ Two main connectivity areas: Table board zone for the operator and sides of operators for equipment
- ✓ Easy modularity that maximize the creation of multiple workposts with full cabling communication
- ✓ Working area with back panel and cover that helps create specific space for each operator
- ✓ Easy and flexible monitor placing inside the cable duct

**T-Line Console** is based on a simple, rounded, balanced and robust conception. A careful research of ergonomics takes into account the fitting of the operator's legs and feet into the base of the console, allowing always a comfortable position. Totem structure for simple management of cabling and equipment and monitor structure to increase ergonomics.

## FEATURES

- Totem structure with movable shelf or standard 19" mounts
- Access to the consoles structure through doors and covers to manage cabling and all the elements
- Monitor structure with horizontal aluminium rail to move brackets horizontally and space for extra equipment
- Console design improves operator position & free movement of feet
- Compartments under the worksurface to store keyboard, mouse or office supplies

RDI disposes of a specific application for organizing crisis or meeting senior management environments which require hosting a large quantity of audiovisual equipment in the structure while managing at the same time all connectivity and cabling infrastructure.

## FEATURES

- Specially designed for the organization of emergency & crisis environments which require audiovisual solutions
- Multiple choices on number of users
- Allows integration of electronic equipment in its interior
- Perfect organization and distribution of the structured wiring

This awesome meeting table counts with all the Type A features but has the plus of a strong aesthetical look.

The surface of the meeting table reaches the floor by a curved phenolic with a rounded edge.

## FEATURES

- Specially designed for the organization of emergency & crisis environments which require audiovisual solutions
- Multiple choices on number of users
- Allows integration of electronic equipment in its interior
- Perfect organization and distribution of the structured wiring
- Wave shape in one of the sides

TYPE A WAVE SHAPE

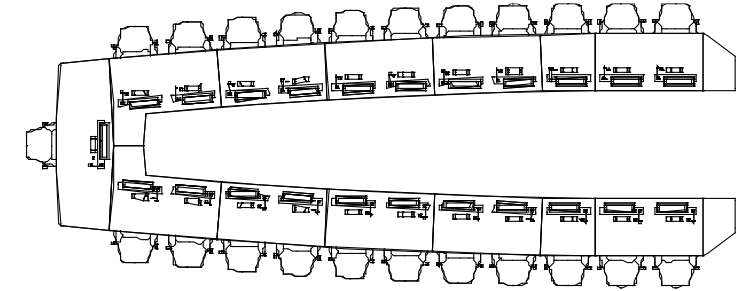

Ref.: MSA-RW7/1

Ref.: MSA-11

Ref.: MSA-17

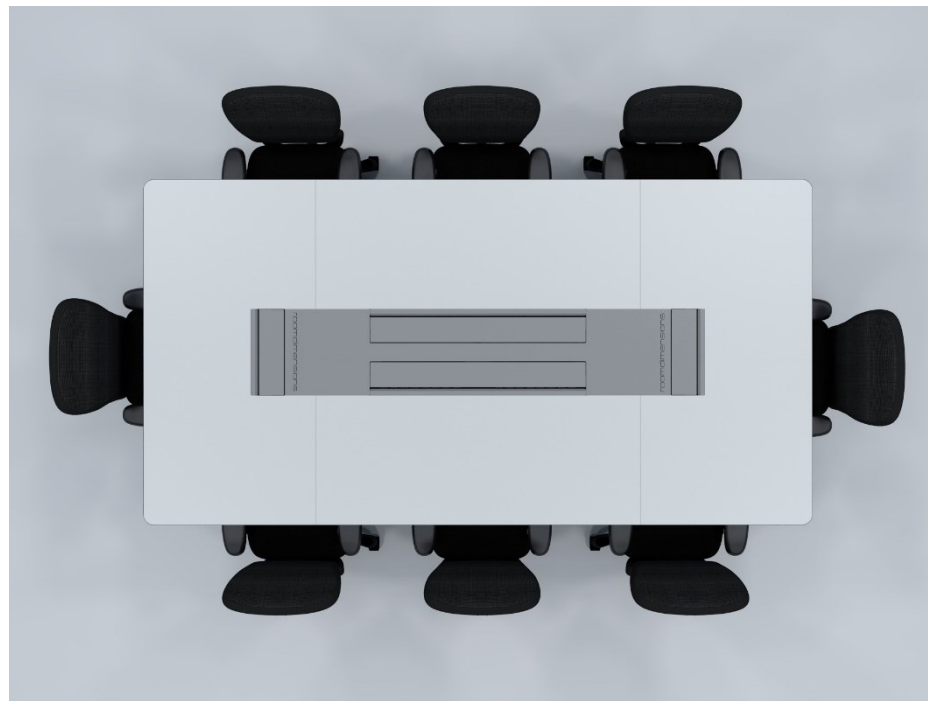

Ref.: MSA-OV23/1

Open technical solution for meeting and crisis environments where it is required the integration of computer equipment and to locate AV accessories in specific points of the table. The solution integrates a range of closed compartments distributed along the table. The user has access to the connectivity zone, from the upper area.

## FEATURES

- Table equipped with a central unit that contains power & data connectors
- The cable duct manages all the wiring from the surface to the compartments
- Electronic compartment destined to house the computer equipment being accessible from the front and back
- The structure itself serves for housing small electronic equipment
- Decorative led lighting applied on each corner of the table board

TYPE B

Ref.: MSB-CLM1x135BPT/1

Ref.: MSB-CLM2x135BPT/1

Ref.: MSB-CLM3x135BPT/1

It is the ideal complement to create adjacent meeting areas of the control centers, where a simple plug-in is required to create common work areas with the necessary connectivity elements well integrated and effortless for the user. Unlike the Type C, it also has space destined to house computer equipment.

## FEATURES

- Central cover fully removable for managing the wiring
- Longitudinally open space to facilitate the entry and exit of wiring cables to the surface of the table
- Desktop unit power, data and USB sockets for the operators. (4x energy and 4x data in every column.)
- Central space between structural feet destined to house computer equipment
- Led lighting on the bottom

LAN HUDDLE is the new meeting point, specifically designed for small working groups. Ideally matched with BARCO, it integrates the basics to perform a meeting call: 55" monitor and different accessories like the ClickShare® BARCO system, webcam, speakers, webconference kit and all the necessary resources to make it possible in a comfortable and easy way.

## FEATURES

- The solution is provided with a 55" BARCO monitor OverView KVD5521B
- Optional accessories to make a video conference:
  1. Barco ClickShare CS-100
  2. HD 1080P Videoconferencing system
- Integrated connectivity
- Compartment for computer equipment storage
- Specific area for webcam

DD Console is a range of technical furniture specifically designed for environments where compact consoles are needed with yet a high technical capacity. Even with its reduced dimensions, keeps all the ergonomic factors that make the user comfortable in any case. The structure is optimized to give technical usability by keeping great aesthetics within 24x7 environments.

## FEATURES

- ✓ Compact console with high capacity that allows the distribution and management of structured cabling and the location of electronic components
- ✓ Specially designed for reduced places that require the same market parameters required for control centers
- ✓ Keeps all the ergonomic factors that make the user comfortable in any case
- ✓ Designed for emergency centers, security rooms or railway, transit port and airport control centers

The **AudioVisual Totem** is intended to the integration of large format monitors, allowing the creation of self standing videowalls composed of flat screens. It is a highly useful solution especially for those operations environments which require self standing solutions capable of managing the electronic equipment and all the infrastructure inside the totem body.

Ref.: AV-T01X1/55

Ref.: AV-T01X2/55

Ref.: AV-T02X2/55

## FEATURES

- Ideal for limited spaces as a substitute of the classic VideoWall
- The 1x1 and 2x1 version with wheels facilitate even more its mobility
- Space destined to house electronic devices on the lowest part with front door access
- Easy adaptation of any kind of monitor size thanks to the VESA support system
- The wiring is completely hidden inside the structure
